

Virtual Programming Options Fall 2020

Through careful planning, research and experimentation - and with the strength of our incredible team of talented Instructors - we've transitioned our business to be able to offer a diverse range of programming online. We are able to work with a variety of virtual classroom and meeting platforms to best meet the needs of any group or school and - as always, our programs will all be tailored to the group to ensure the highest level of engagement, education and fun! From socializing with friends to exploring a new topic or honing a specific skill - we offer programs for all ages and interests. It is our sincere hope to be back in the schools offering in-person programming very soon - until then, we hope to stay connected to the communities we enjoy so much through these programs and more.

Interested in a program but don't see it on our list? Let us know - we've shown we have the know-how to develop a curriculum suited to your needs!
